

Telos® Corporation offers technology solutions and services that empower and protect the world's most security-conscious enterprises. We empower our customers with secure solutions that leverage cloud technology, real-time collaboration, and mobile communications. We protect vital assets that include the critical operational and tactical systems of our customers so they can safely conduct their global missions. We serve the United States military, intelligence and federal civilian agencies, allied nations around the world, and members of the Fortune 500.

Understand your risk. Reduce your attack surface.

Two of the greatest priorities for protecting your organization in the cyber domain are *understanding and managing risk* and *reducing your digital attack surface*. With more than two decades' experience in defending globally connected enterprises, Telos delivers the capabilities you need for cyber situational awareness, cyber threat protection, and effective response when a breach inevitably occurs.

Telos: A singular record of accomplishments in information and cybersecurity.

- Conducts security assessments for and defends the most-attacked networks in the world
- The dominant commercial provider of security risk management and compliance solutions to the U.S. federal government, including the Intelligence Community (IC), Department of Defense (DoD), and the Department of Homeland Security (DHS)
- Launched the first commercial web-based application to automate risk management and security compliance processes in 2000
- Provided the largest deployment of enterprise wireless mobility networks for the U.S. DoD
- Chosen by the U.S. Air Force as the integrator of choice for worldwide deployment of secure accredited wireless LANs
- Integrator of record for the federal government's largest identity application with more than 10 million personnel
- Leading TSA-certified aviation channeler with more than 60 airport and airline customers
- Secure communications system of record for DoD and the IC

Cybersecurity Solutions and Services

Our pedigree in cybersecurity and information assurance spans three decades. Our offerings include independent counsel for your information security requirements and enterprise solutions for IT risk management and continuous compliance.

Xacta®: Manage IT risk and assure continuous security compliance. The Xacta solution suite automates risk management and security compliance processes for systems based on premises, in the cloud, and in hybrid environments.

Telos Ghost®: Protect users and information by making them disappear. Telos Ghost offers a completely anonymous way for modern companies and government agencies to conduct business, connect global resources, and do research online.

Cybersecurity services for business, government, and critical infrastructure. Consulting and counsel for your organization including security assessments, security engineering and operations, penetration testing, and digital forensics.

Cloud and Enterprise Security Solutions

Telos develops and deploys an array of capabilities for enterprise IT security, including:

Cloud security compliance. Telos has optimized its Xacta solution for risk management and security compliance of cloud-based workloads to eliminate barriers to cloud migrations and achieve continuous compliance in the cloud.

Secure mobility. With a background in delivering solutions in the most challenging mobile networking environments, Telos enables you to connect to any information source from anywhere, at any classification level, over any wireless medium, using any device.

Identity management. Telos Identity Management Solutions LLC (Telos ID) is the leading provider of identity assurance services to the aviation industry, an FBI-certified channeler, and manages the federal government's largest identity application.

Secure communications. Telos Automated Message Handling System (AMHS) maximizes the efficiency of secure organizational messaging for more than 70 organizations around the world, including the U.S. Army, Marine Corps, Air Force, and Coast Guard, and multiple defense and intelligence agencies.

Telos Support: A Commitment to Excellence

The Telos Customer Support Center is staffed with cross-trained and certified personnel who provide Level I and II support for problem analysis and identification for Telos secure solutions and most major hardware brands. Our Telos Concierge Service (TCS) is a robust customer support program that minimizes time-to-value by providing application support, access to the TCS Customer Support Portal, and subject matter expertise.

Partnerships That Benefit Our Customers

Telos works closely with strategic partners whose products and services complement ours and benefit our customers in terms of performance and value. If you're an IT vendor with an industry-leading technology, contact us about a mutually productive relationship.
