

Telos[®] Concierge Service

Creating customer experiences as exceptional as our technology

Included with your Xacta[®] 360 purchase, you have full access to Telos Concierge Services (TCS), a robust customer support offering that minimizes the time-to-value by providing application support, access to the TCS Customer Support Portal, and limited subject matter expert (SME) support.

Always available help desk support staff

Our cross-trained and certified personnel are standing by to provide general application support and assistance. You can count on them to keep you informed and to track your support request through to resolution.

Information at your fingertips through a customer support portal

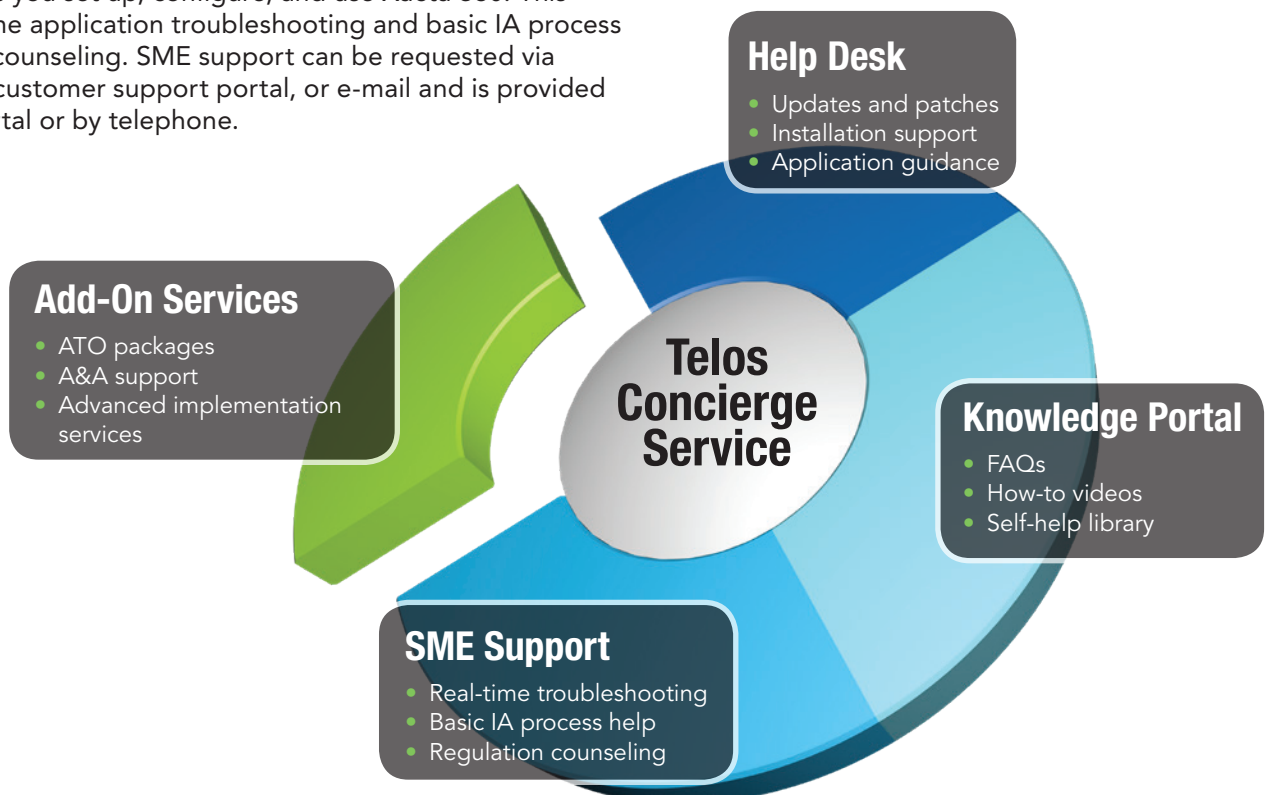

An extensive library of self-help content such as application manuals, FAQs, and instructional videos will help you quickly set up users, configure templates, and use Xacta 360 to achieve your specific organizational goals.

You have ongoing contact with Concierge team members through multiple entry points to answer your questions, and put you in touch with product experts as needed.

And you can create and monitor the status of your support requests in real-time.

Limited subject matter expert support

Cyber security, compliance, and information assurance (IA) SMEs are prepared to address more complex issues and questions that you may have as you set up, configure, and use Xacta 360. This includes real-time application troubleshooting and basic IA process and regulation counseling. SME support can be requested via telephone, the customer support portal, or e-mail and is provided through the portal or by telephone.

Advanced Services from Telos Professional Services Team

Telos has over 150 security engineers and analysts with decades of experience helping customers fully comply with public and private compliance regulations and other guidelines for information security.
