Telos®

Solutions that **Empower** and **Protect** the Enterprise.

Telos® Corporation offers technology solutions and services that empower and protect the world's most security-conscious enterprises. We empower our customers with secure solutions that leverage cloud technology, real-time collaboration, and mobile communications. We protect vital assets that include the critical operational and tactical systems of our customers so they can safely conduct their global missions. We serve the United States military, intelligence and federal civilian agencies, allied nations around the world, and members of the Fortune 500.

Understand your risk. Reduce your attack surface.

Two of the greatest priorities for protecting your organization in the cyber domain are *understanding and managing risk* and *reducing your digital attack surface*. With more than two decades' experience in defending globally connected enterprises, Telos delivers the capabilities you need for cyber situational awareness, cyber threat protection, and effective response when a breach inevitably occurs.

Telos: A singular record of accomplishments in information and cybersecurity.

- Conducted assessments for and defended the most attacked networks in the world
- The Xacta® solution is the database of record for the U.S Intelligence Community
- Integrator of record for the largest identity management application in the U.S. federal government
- Selected by Amazon Web Services (AWS) and Microsoft Azure for cloud compliance solutions
- Identity vetting application deployed at more than 90 airports and airlines across the U.S.
- Authorized by the FBI to provide real-time identity background checks
- Delivered the largest deployment of secure enterprise wireless networks to the U.S. Department of Defense
- Provides the standard for organizational messaging throughout the U.S. DOD, diplomatic corps, other critical requirements

Cybersecurity

Our pedigree in cybersecurity and information assurance spans three decades. Our offerings include independent counsel for your information security requirements and enterprise solutions for IT risk management and continuous compliance.

Xacta: Manage cyber risk and assure continuous security compliance. The Xacta solution suite automates risk management and security compliance processes for systems based on premises, in the cloud, and in hybrid environments.

Telos Ghost®: Protect users and information by making them disappear. Telos Ghost offers a completely anonymous way for organizations to conduct business, connect with global resources, and do strategic and cyber threat research online.

Cybersecurity services for business, government, and critical infrastructure. Consulting and counsel for your organization including security assessments, security engineering and operations, penetration testing, and digital forensics.

Cloud Security

Telos smooths your move to the cloud and protects your cloud-based assets with secure migration services and solutions that enable continuous compliance with industry and government security standards.

Secure cloud migration. Telos cloud security personnel assist customers with their move to the cloud while ensuring that the proposed solution architecture abides by the customer's security policies and standards and the cloud host's best practices.

Cloud security compliance. Telos has optimized its Xacta solution for risk management and security compliance of cloud-based workloads to eliminate barriers to cloud migrations and achieve continuous compliance in the cloud.

Enterprise Security

Telos ensures that your personnel can work and collaborate securely and productively across and beyond the enterprise to achieve your tactical and strategic goals.

Secure mobility. Our background in delivering solutions in the most challenging mobile networking environments enables you to connect to any information source from anywhere, at any classification level, over any wireless medium, using any device.

Identity management. Telos Identity Management Solutions LLC (Telos ID) is the leading provider of identity assurance services to the aviation industry, is an FBI-certified channeler, and manages the federal government's largest identity application.

Secure communications. Telos Automated Messaging Handling System (AMHS) maximizes the efficiency of secure organizational messaging for more than 70 organizations around the world, including the U.S. Army, Marine Corps, Air Force, and Coast Guard, and multiple defense and intelligence agencies.

Network management and defense. We provide the full spectrum of managed services and solutions for operating, administering, and defending complex enterprise networks. These offerings give you the benefit of our services without having to commit to the cost and burden of providing the resources yourself.
