

Telos® Corporation is a leading IT and cybersecurity solutions and services provider, dedicated to transforming requirements into superior results for government and commercial customers. We offer unmatched technical expertise, global reach, and

strategic partnerships. We have also built a culture of innovation focused on digital transformation — taking complex technology solutions and making them actionable and secure.

A singular record of accomplishment in information and cybersecurity.

- Provide every facet of base-level support (help desk, client support, asset management, engineering, program management, etc.) to over 30 DoD locations
- Air Force WLAN provider of choice since 2006: ongoing expansion and tech refresh, including USAFE/AFAFRICA/PACAF
- Migrating and modernizing voice communications to a VoIP solution in the Pacific theater for the U.S. Army
- Expertise in deployable communications: TDC kits and secure Black Core Architecture; Deploy Anywhere Wireless Node (DAWN)
- Relocating and realigning information and communications infrastructure for U.S. Army on the Korean peninsula

- Wired and wireless
- LTE/5G
- SD-WAN
- NIPR/SIPR/JWICS
- VOIP/VOSIP
- Routing/switching
- SATCOM

Defensive Cyber Operations

- Real-time threat monitoring and analysis
- Test, detect, event mitigation
- Incident response and remediation
- Continuity of operations
- End point protection

- Security policy enforcement
- Vulnerability scanning
- Patch and configuration management
- Encryption setup and support
- Intrusion detection / prevention
- Firewall installation and monitoring
- Virus and malware protection

Operations and Sustainment

- SDN/VOIP/VDI/TDM
- Network monitoring / management
- Physical and virtual servers
- Multi-cloud operations
- Security incident event management

- Tech refresh
- User experience
- System administration

Deployable Comm

- Deployable infrastructure
- Design, build, test, field, support
- Packages/solutions
- Edge compute and store
- Virtualization
- Software-defined networks

Innovation and Digital Transformation

- Cloud migration, operations

Service Desk

- Tiers 0-3
- Call/Service Center

- IT Service Management (ITSM)
- End-user device management
- Incident/problem management

Security/Compliance

- Network security architecture design and implementation
- Network security testing and evaluation
- IT security operations and management
- Risk and vulnerability assessment/mitigation
- Patching and hardening
- DISA STIGs and SRGs
